6. SVLSACE/SVREMP Website Launch – Further to previous discussion, the SVLSACE website has now been launched. The website is still being populated with some information but the basic framework and layout is up and running. The website includes pages for SVLSACE administrative records, member village and associate stakeholders information (links to websites), a spot for All-Net login and sign-up for those members who have joined that service and a growing resource page as well. We have also worked with SVREMP to set up and populate several pages regarding Emergency Management; we have a good start of the background/resource side of that done, but still working on the administrative/committee workspace side. If anyone notes corrections/edits or wants to add something feel free to let Administration know – we will try and make sure revisions are addressed every 2 months (or sooner if it is urgent/time sensitive information). The website is [www.svlsace.ca](http://www.svlsace.ca).

*(here for discussion – accept the update as information, or other direction as warranted)*

7. 2021 Councillor Training, Muni 101 – Administration has been in touch with Elected Official Education Program Representatives to inquire about hosting/co-hosting fall 2021 Muni 101 session for new SVLSACE member councils post election season. At

this time they plan to hold summer village specific training in the fall season via Zoom; the link to these courses will be posted at [www.eoep.ca](http://www.eoep.ca) as early as June 1<sup>st</sup>, 2021 and each municipality can arrange registration for their members in due course.

*(here for discussion – accept update as information, or other direction as warranted)*

8. Regionalization ACP Grant Project Update – Those member municipalities who have expressed interest in exploring this concept were able to meet on May 27<sup>th</sup>, 2021 and have a good discussion on progress, priorities and next steps. Although not all SVLSACE members are participating in this study, all of our members are interested in the progress and finding. A brief update and discussion, through Sunset Point (ACP managing partner), would be welcome.

*(here for discussion – accept the discussion as information, or some other direction as warranted)*

- 9: 10:00 a.m. – Pegasus Imagery Ltd. Presentation – Cole Rosentreter, CEO of Pegasus, will join the call to introduce the business. Pegasus operates out of Villeneuve Airport and, among other services, was recently a supporting resource called to assist with real time data and imagery gathering for Parkland County while fighting wildfires. As SVLSACE and SVREMP work to make our local fire and emergency response capabilities stronger and more efficient, Pegasus may be a contact worth keeping in the address book and introducing to our other resources.

*(here for discussion – accept the presentation and discussion as information, or other direction as warranted)*
