Regional Support Affiliate refers to an organization, agency, business, cooperative, or stakeholder that is formally or informally connected to a regional initiative, partnership, or organization in a supportive, collaborative, or advisory capacity.

The term generally implies that the affiliate:

- supports the goals and objectives of the regional organization;
- participates in collaboration, communication, planning, or resource-sharing activities;
- may contribute expertise, services, infrastructure, or operational assistance;
- is associated with the organization without necessarily holding governing authority or voting status.

In the context of SVREMP, a **Regional Support Affiliate** such as Ste. Anne Natural Gas Co-op Ltd. could be described as:

An affiliated regional organization that provides operational, infrastructure, advisory, or collaborative support to regional emergency management planning, preparedness, response, and recovery initiatives.

The term works well because it:

- sounds professional and inclusive;
- recognizes regional collaboration;
- avoids implying formal governance authority;
- allows flexibility for future participation levels.
